Our marble tiles are classified as decorative wall tiles and are not recommended for flooring, countertops, or outdoor installations with direct sunlight.

They are ideal for backsplashes and wall murals.

Marble Tile Installation:

☐ Each tile is marked with a Row Letter & Column Number.
☐ Use a Sand-Free grout, which is available at all home improvement stores.
☐ To apply grout to the tiles, use a grout float with a rubber face.
☐ Seal the marble tiles and grout with a penetrating marble and tile sealer such as TileLab 4Care Penetrating Sealer, Grout & Tile Sealer by Custom Building Products available at most hardware stores. It is in a yellow bottle with Green & White lettering. ***Avoid using sealers with high gloss or a built-in finish.***

Marble Tile Care:

☐ Avoid using abrasive cleaners or scouring pads directly on the tile surface.
